Of Computer & Emerging Sciences Karachi

## **Course Outlines of BSCS Degree Program**

| <b>Course Instructor</b>  | Mr.Mohammad Jamil / Dr.Khusro Mian / Mr.Nadee | em khan Semester Spring |  |  |  |  |
|---|---|-------------------------|--|--|--|--|
| Batch/Section(s)  | Batch 2019 / Sections A,B,C,D,E,F,G,H,I       | <b>Year</b> 2019        |  |  |  |  |
| <b>Course Title</b>   | CS 325 NUMERICAL COMPUTING                    | Credit Hours 3          |  |  |  |  |
| Prerequisite(s)   |   | Course TA               |  |  |  |  |
| Text Book(s)  |   |                         |  |  |  |  |
| Title of book Numerical Analysis , 9 <sup>th</sup> Edition  Author(s) Burden and Faires       |   |                         |  |  |  |  |
| Reference Book(s)   |   |                         |  |  |  |  |
| 1) Numerical Methods using MATLAB, 3rd Edition  |   |                         |  |  |  |  |
| John H.Mathe  | WS  |                         |  |  |  |  |
| 2) Applied Numerical Methods with Matlab for Engineers and Scientist, 3 <sup>rd</sup> Edition |   |                         |  |  |  |  |
| Steven C,Chapra   |   |                         |  |  |  |  |

## **Course Objective:**

- To introduce the students to the mostly used computing methods in the different fields of engineering and sciences.
- The emphasis will be on understanding the algorithem of the various methods for computing and on applying these to obtain the approximate solutions for various mathematical problems.
- MATLAB & Maple will be used as tool for implementation and application of these computing methods.

### **Course Description:**

The Numerical computing includes: Error concept and analysis, Roots of nonlinear algebraic equations of one variable, Direct and iterative method for system of linear equations, Linear interpolation with 2nd and  $3^{\rm rd}$  dimensional, Interpolating polynomials, Differences, Operators and their relation, Numerical differentiation and integration, Numerical solution of differential equation. Iteration for nonlinear system of equation

| Week | Contents / Topics  | Exercise                 | Questions            | Exam |
|------|--|--------------------------|----------------------|------|
|      |  |                          |                      |      |
| 1    | Error analysis: Introduction of Numerical Computing Methods: Chopping.Roundoff and truncation error Absulute ,relative and percentage error Significant figures in approximation, loss of significance | 1.2                      | 1,4,5-8              | A1   |
| 2    | Solution(Root) of equations in one variable:   | 2.1                      | 1-6,12,13            |      |
|      | The Bisection or Binary-search method. Fixed Point iteration. $(x=g(x))$   | 2.2                      | 1-6,9-11,14          |      |
| 3    | Newton's Raphson and Secant Method.  |                          |                      | Q1   |
| 4    | Method of False position (Regula falsi).   | 2.3                      | 1-10                 |      |
| 5    | Interpolation and Polynomial approximation: Lagrange interpolation polynomial of degree one,two and three  | 3.1                      | 1,2,5,6              |      |
| 6    | Mid 1 Exam   |                          |                      |      |
| 7    | Divided difference table and interpolating polynomial.<br>Newton Forward and Backward difference formula   | 3.3                      | 1-6,9                |      |
| 8    | Newton centered difference (stirling) formula.   |                          |                      | A2   |
| 9    | Numerical differentiation: Differentiation using Forward and Backward differences 3-point Endpoint and Midpoint formula 5-point Endpoint and Midpoint formula  | 4.1                      | 1,2,5,6,18,<br>25,26 |      |
| 10   | Numerical Integration: Trapezoidal and Simpson's rule Closed and open Newton-Cotes formulas.   | 4.3                      | 1,2,5-10,22          | Q2   |
|      | Composite Numerical Integration: Trapezoidal , Simpson's and Midpoint formula  | 4.4                      | 1-4,7,8,11           |      |
| 11   | Mid 2 Exam   |                          |                      |      |
| 12   | <b>Differential Equations:</b> Euler's method , 2-RK method , Mid Point formula  | 5.2                      | 1,2,5<br>1-4         |      |
|      | Modify Euler and Huen's method , 4-RK method   | 5.4                      | 5-8 , 9-12<br>13-16  | A3   |
| 13   | Direct Method for solving linear system: LU decomposition (Dolittle and Crout) Symmetric ,Singular ,Diagonally dominant  | 6.5                      | 1,2,3-6              |      |
|      | and positive definite matrices LDL <sup>t</sup> Factorization , cholesky method  | 6.6                      | 1-3,5,11,12          |      |
| 14   | Iterative Techniques: Iterative methods for solving linear system Gauss-Siedel and Jacobi's methods.   | 7.3                      | 1,2,3,4              | Q3   |
| 15   | <b>Difference Operator analysis:</b> $\Delta$ , $\nabla$ , $\delta$ , $\mu$ , D and E operators and their relations.   | Handout will be provided |                      |      |
| 16   | Revision / Matlab Prog. / Presentation (optional)  | _                        |                      |      |

Course coordinator : Jamilusmani

#### **Grading Criteria:**

#### **Marks Distribution:**

| Particulars                       | % Marks |  |  |
|-----------------------------------|---------|--|--|
| 1. Class participation/Attendance | 00      |  |  |
| 2. Quizzes/ Assignments           | 10      |  |  |
| 3. Project /Programme             | 10      |  |  |
| 4. First Mid Exam                 | 15      |  |  |
| 5. Second Mid Exam                | 15      |  |  |
| 6. Final Exam                     | 50      |  |  |
| Total:-                           | 100     |  |  |

## Important Instructions to be followed for this Course

- Be in classroom on time. Any student who arrives more than 5 minutes late in the class would be marked LATE. Anybody coming to classmore than 15 minutes late will be marked ABSENT.
- Turn off your cell phones or any other electronic devices before entering the class.
- Maintain the decorum of the class room all the time.
- Avoid a conversation with your classmates while lecture is in progress.
- Submit your assignments on time, no assignment will be accepted after the deadline.

#### Instructions / Suggestions for satisfactory progress in this course:

- On average, most students find at least three hours outside of class for each class hour necessary for satisfactory learning.
- Chapters should be read and homework should be attempted before class.
- Do not get behind. You are encouraged to work with other students. Plus, I am always available during office hours to help you.
- The homework assigned is a minimum. You may always work extra hours on your own.
- Use the few minutes you usually have before the start of each class to review the prior meetings' notes and homework. This will save us valuable in-class time to work on new material.
- Develop a learning habit rather than memorizing work in groups, whenever appropriate.
- Apply the learned principles and gained knowledge.
- Be creative in thinking, but stick to the topic assigned for discussions, assignments and presentations.
- Always bring your **Work Book** and **Calculator** with you in the class.

**Note:** Students are welcome all the time in office to get help from the Teacher.
